

PLASTIC STORAGE SYSTEMS

F U N E R A L

RE A plastic trolleys for storing and moving flower arrangements, wreaths, flowers, etc. are ideal in terms of their use. They are hygienic, low-noise, multi-functional, reliable and have a neutral appearance. Highly recommended for funeral homes.

History

The story is actually extremely simple. In 1964, the founder of REA, Siebe Rijploeg, developed a plastic storage rack. The rack was as simple as it was revolutionary. REA was the first to produce a plastic storage system that satisfied an urgent need in the food industry. It was finally possible for food to be stored in a hygienically responsible manner. In other sectors too, including the hospitality sector, hospitals and other care institutions, funeral parlours, rehabilitation units, swimming pools and sports facilities, the storage systems were found to meet specific requirements. Over the years, REA has built up an excellent reputation. Every day, professionals throughout the world experience the ease and benefits of REA plastic storage systems.

Working Comfortably

It goes without saying that you like to work comfortably in your own environment. REA plastic trolleys make a practical contribution to this when taking delivery of, storing and moving flower arrangements, wreaths, flowers, plants etc. REA is familiar with the criteria and offers custom-built solutions and more ...

Quality

Characteristic of REA Trolleys is that they are low-noise when being moved around and they have a neutral appearance. In addition, they are easy to operate and maintenance free. On account of the construction and the use of high-quality materials, the systems are extremely durable.

- durable
- all plastic
- flexible design
- easy to assemble
- efficient
- low-noise
- maintenance-friendly
- hygienic
