## WITH OUR STORAGE SYSTEMS

# REA FOR LEISURE

Welcome to the world of smart and hygienic storage systems and solutions for the recreational sector.

At REA, we have an unrivalled understanding of what is important in environments where people relax, play, exercise or spend their holidays. Whether it concern a swimming pool, holiday park, sports complex or wellness centre - functionality, ease of use and hygiene are paramount.

Designed to withstand heavy use and be easy to clean, our robust plastic products are designed to last. Take, for example, changing room benches, bench seating, facilities for children, storage systems and more - all designed with comfort, safety, and aesthetics in mind.

Discover in this brochure how REA can help you furnish any area in a practical and stylish way.

Kind regards,

**Hubert van Hooren**  
Managing Director

## A BRIEF HISTORY

In 1964, Siebe Rijploeg, REA's founder, developed a plastic storage rack. The rack was as simple as it was revolutionary. REA was the first to launch a plastic storage system that met a pressing need in the food industry. It proved to be an enormous success. Businesses were finally able to store food products in a hygienic way.

The plastic products have also proved innovative in swimming pools, sports facilities - and rehabilitation centres - and continue to stand the test of time. Over the years, further innovations to the systems have led to REA acquiring a reputation for excellence around the globe.

# SMART AND SAFE SOLUTIONS FOR ANY SPACE

Safety, hygiene, and ease of use are essential in the recreational sector. Efficient storage and child-proof products, such as children's playpens and changing tables for babies create a professional and inviting setting.

REA products are designed to meet the wide-ranging needs of the leisure industry. From holiday parks and campsites to swimming pools and indoor play centres - wherever people gather, there is a need for durable, hygienic, and practical solutions.

Our modular system offers flexible storage and design options that are easy to adapt to the available space and needs of your location. Whether you are looking for compact solutions or robust systems for larger facilities, REA can always provide the right setup.

## **Child-friendly and certified**

More and more recreational locations are welcoming families with young children. This is why, in addition to storage solutions, REA offers child-proof products, such as certified children's playpens and changing tables for babies. These are stable, splinter-free, easy to clean and meet all safety standards - ideal for baby changing areas, sanitary facilities or play areas.

They give parents peace of mind and boost the child-friendly appeal of your location - an important plus point for families when choosing a holiday destination.

## **Durable and easy to maintain**

REA systems are made from high-grade, impact-resistant plastic: lightweight, sturdy, resistant to rust and moisture and easy to clean. They can withstand temperatures ranging from -40°C to +80°C, which makes them suitable for both indoor and outdoor use. Many of our systems are mobile and come with optional rubber buffers to prevent damage to walls and floors.

## **Customised solutions**

Alongside a wide range of standard products, REA also provides customised solutions. Whether you are looking to store pool accessories, cleaning products or facilities for babies: We offer practical, safe, and durable solutions that are a perfect fit for your individual situation.

REA combines innovation, quality and safety to create spaces that are more efficient and feel welcoming.

# REA AND LEISURE ARE A PERFECT MATCH

Swimming pools ■ Leisure centres ■ Water sports centres  
Fitness centres ■ Saunas ■ Changing rooms

## WHY YOU SHOULD CHOOSE REA

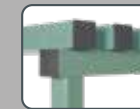

Our sturdy and modular plastic shelving systems are lightweight, durable, and hygienic - perfect for storage in the leisure industry. Whether they are destined for use in swimming pools, campsites or holiday parks, our solutions combine quality and ease of use. We have been a reliable partner for businesses in the recreational sector for sixty years now.

### Classic, Design en Grey

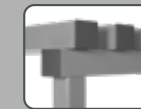

REA plastic storage systems are available in green and grey tube profiles. Classic and Design are both green, whereby Classic has the traditional red finish and Design the grey finish. Grey is the (new) model available in grey tubular profiles with a grey finish.

### Original Dutch Design

Over the past sixty years, REA plastic storage systems have shown themselves to be almost indestructible and are instantly recognisable thanks to their distinctive colour range and robust look. This original Dutch product provides every user with a reliable and durable solution.

### Customised

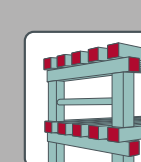

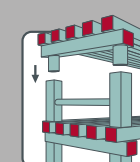

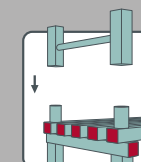

REA allows you to make the most of any space, thanks in part to the wide range of dimensions (depth, height, and width) available in the standard delivery programme. Please contact us for more information on the available options.

### Mobile

All the systems can be supplied with wheels. As standard, plastic wheels are fitted with a noise-reducing, seamless rubber tread. Although stainless steel with nylon wheels is also available. The wheels can be supplied with or without brakes. Mobile systems can also be fitted with rubber buffers to protect walls and door frames.

### Easy assembly

REA storage systems are designed with hassle-free assembly in mind. No need for tools or technical expertise - you can start using the storage system in no time.

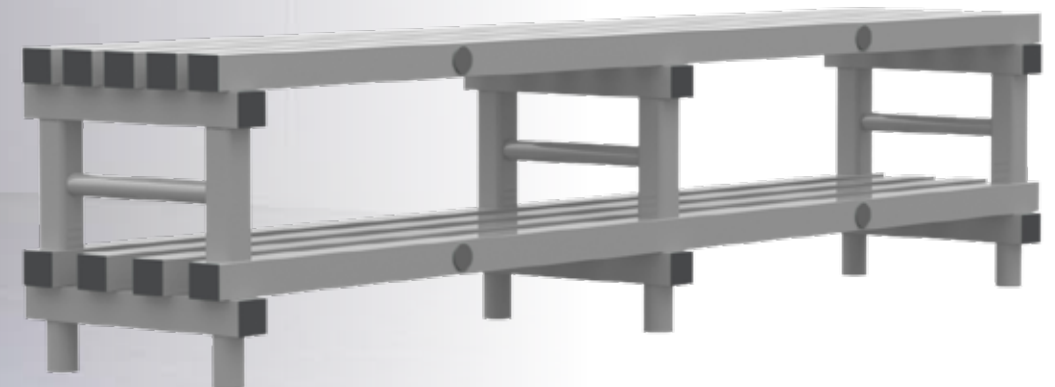

# FOR SEATING, HANGING UP GEAR, CHANGING CLOTHES

## CHANGING ROOMS IN PEAK CONDITION

From sports clubs to holiday parks: With REA's changing room benches, every changing room can be kept tidy, functional and comfortable. Even during peak periods.

REA manufactures sturdy and hygienic changing room benches, specially designed for recreational environments such as swimming pools, sports facilities and holiday parks. Our benches are available in single- or double-sided models, with or without a coat rack section, offering both comfortable seating and smart hanging options.

Thanks to their impact-resistant plastic construction, the benches are lightweight, shatterproof and easy to clean. Ideal for intensive every-day use in damp spaces.

The ergonomic seating height, ample under-seat storage space for bags and shoes, and the

sturdy top shelf with clothes hooks help to keep the changing room neat and tidy. With lengths ranging from 80 to 200 cm - or made to measure if need be - REA will always fit your space and needs perfectly.

REA designs plastic storage systems that are a perfect match for the leisure industry. Whether destined for use in swimming pools, sports centres or holiday parks, our flexible and durable concept provides the ideal solution, with hygiene and a long service life as core values. What makes our system so perfect for your environment?

OPTIMUM USE OF SPACE

The flexible design means that our systems can be fitted perfectly to the dimensions and needs of your storage space. Whether you have a narrow cupboard, a high storage area or an irregular layout, REA can help you make the most of your space. Mobile systems are also easy to move around, allowing you to organise your storage space dynamically and efficiently.

SAFE

REA plastic systems also offer ideal solutions for use as changing tables for babies or children's playpens. The impact-resistant plastic is completely splinter-free, does not rust and has rounded corners, making them safe for children to play in or to receive personal care. Moreover, the material is easy to clean and creates a hygienic environment.

LOCKABLE STORAGE

REA's lockable storage solutions offer extra security and protection for personal belongings or equipment belonging to the different clubs that use the recreational facilities. This storage is extremely varied, from ball bins to a variety of material trolleys in several sizes.

WATER-RESISTANT

REA also manufactures bench seating for changing rooms. From standard bench seating to double changing room benches with hook rails. This is an easy way to provide additional seating in changing rooms for sports centres, swimming pools and holiday parks. Lightweight but super sturdy, they are a perfect addition during busy times.

The options available to chop and change with the REA system is extensive. Have you got a specific question about our products? Please do not hesitate to contact us.
